Summary

I am a researcher at the FBK NLP in Trento, Italy. This Fall, I will start my PhD at the Bethge Lab in Tübingen, Germany, as an ELLIS PhD Student and as part of the International Max Planck Research School for Intelligent Systems (IMPRS-IS). I also work with Tom Silver's group for robotics and planning in Princeton, US. Previously, I obtained my MSc degree in Machine Learning, Data Science and Artificial Intelligence from Aalto University in Helsinki, Finland.

I am interested in developing autonomous AI agents that learn from experience and adapt dynamically to new situations. For this, my research is at the intersection of large-scale vision and language models, reinforcement learning, and planning. In particular, I believe world modeling to be a key component for building intelligent agents that can reason about the world and plan their actions accordingly. I work with both simulated games and real-world robotics as environments for agents to learn and adapt in. I am also curious about the connections between AI and cognitive science, and how insights from human cognition can inform the development of more intelligent agents.

Education

M.Sc. Aalto University [↗](#), Machine Learning, Data Science and Artificial Intelligence Sept 2022 – Sept 2024

- Graduated with honors, with a **final grade of 5.0/5.0** and a **GPA of 5.0/5.0**.
- **Thesis** [↗](#): **Generating Code World Models with Large Language Models Guided by Monte Carlo Tree Search**, supervised by Prof. Pekka Marttinen, published at NeurIPS 2024.
- Thesis awarded as one of the three **best MSc theses of 2024** at the School of Science.
- Received the Dean's Scholarship for outstanding academic performance.

B.Sc. University of Trento [↗](#), Computer Science Sept 2019 – July 2022

- Graduated with a **final grade of 110/110 cum laude (with honors)** and a **GPA of 28.46/30**.
- Thesis: **Route Optimization for Indoor Spaces**, supervised by Prof. Alberto Montresor (in Italian).

H.S. Liceo Scientifico Leonardo da Vinci [↗](#), Liceo Scientifico (Italian Scientific High School Diploma) Sept 2014 – July 2019

- Graduated with a **final grade of 100/100**.

Experience

Researcher, Fondazione Bruno Kessler [↗](#) Trento, Italy
Working as a pre-doctoral researcher ("Researcher 4 contract") in the **Natural Language Processing Lab** [↗](#) under the supervision of Bernardo Magnini. Jan 2025 – present

- Lead researcher on FBK's side of a joint project on **planning with Vision-Language Models** (with Aalto University), under resubmission.
- Led a second project on **selectively integrating VLM guidance with model-free Reinforcement Learning** based on the agent's own uncertainty, with a preliminary version accepted at the CAIPI workshop at ECAI 2025 and a full paper in preparation.

- Participating on private research for collaborations with companies.
- Contributing to the draft of a **Horizon Europe funding proposal**, leading the lab's team for Language and Reinforcement Learning.
- Active participation to the research group's scientific activities, including monthly meetings and collaborative discussions.

Research Assistant, [Aalto University](#) [↗](#)

Helsinki, Finland

MSc Thesis worker in the [Foundation Models for Language and Reinforcement Learning](#) [↗](#) (Larel) group, supervised by Prof. Pekka Marttinen. Aug 2024 – Sept 2024

- Conducted a research project on **Symbolic Regression with Large Language Models**, presented at the ACL Student Research Workshop.
- Co-led a research project on **Code World Models** with PhD candidate Nicola Dainese, forming the basis of my Master's Thesis, accepted at NeurIPS 2024.
- Started a project on **planning with Vision-Language Models**, later continued by both Aalto University and my current group at FBK.
- Regularly attended lab meetings and participated in broader academic activities, including the Seminar on Large Language Models.

Internship, [ThinkIN](#) [↗](#)

Trento, Italy

Worked as a software developer intern in collaboration with the University of Trento. Feb 2022 – June 2022

- Designed and built a prototype for an indoor navigation system specifically targeted for supermarkets, to be used with the company's own location tracking system.

Proceedings of the 62nd Annual Meeting of the Association for Computational Linguistics, Volume 4: Student Research Workshop (ACL 2024 SRW)

** denotes equal contribution*

Additional Experience and Awards

Master's Thesis Award [↗](#): My Master's Thesis was awarded as one of the three best MSc theses of 2024 at the School of Science.

Volunteer

Volunteer , Libera Associazioni Nomi e Numeri Contro le Mafie ↗	Calabria, Italy July 2017 – July 2017
I participated in a volunteering camp experience in southern Italy where we cultivated the fields of mafia-confiscated houses for the Libera association, while also taking part in various activities on the territory and listening to testimonies from victims and policemen.	
Volunteer , Associazione Volontaria "Per un Mondo Migliore" ↗	Rijeka, Croatia Aug 2018 – Aug 2018
I participated in a volunteering camp experience in Rijeka, Croatia where we helped different families and associations in need around the city and in mainland Croatia while living together in a shared home.
